

ATTACHMENT 1

Table 1. Types of Activities Potentially Required of Applicants for Demolition Permits by this Regulation and the Associated Resources to Implement the Activities.

Potentially Required Applicant Activity ¹	Resource ¹
Initial screening: building age, use, construction type	Applicant staff time
PCBs in priority building materials screening	
Research material specific formulations	Applicant staff time and/or hire consultant
Develop representative sampling plan	Hire consultant
Sample collection and analysis	Hire consultant and analytical laboratory
Notifications to regulators	Applicant staff time and/or hire consultant
Removal of priority PCBs-containing materials	
Develop removal/disposal plan	Hire consultant
Implement removal plan	Hire consultant and/or abatement contractor
Verification sample collection and analysis	Hire consultant/contractor and analytical laboratory
Any required additional site investigation and cleanup ²	
Work with regulator (e.g., EPA) before and during investigation and cleanup	Applicant staff time and/or hire consultant
Develop site investigation and cleanup plan	Hire consultant
Implement site investigation and cleanup plan	Hire consultant and/or abatement contractor
Verification sample collection and analysis	Hire consultant/contractor and analytical laboratory
Waste transport and disposal	
PCBs waste transport and disposal	Hazardous waste transport and landfill fees
Municipal waste transport and disposal	Municipal waste transport and landfill fees
Reporting, completion of forms, certifications	Applicant staff time, hire consultant
Oversight and management	Applicant staff time, hire consultant

¹ The actual specific activities/resources required and associated costs will vary greatly depending on the project.

² For example, cleanup of substrates adjacent to the PCBs-containing materials, site sediments, and/or site soils.
