Subject: Cypress Park
Date: Wednesday, June 24, 2020 7:35:51 PM

Honorable Mayor and City Council:

Please advise plans for Cypress Park. I have impression that decisions have already been made and public is not aware. I was shocked to learn about removal of Cypress Park!

There was no information provided live stream at today's meeting other than moving Cypress Park to Linden. Old Town is in need of parks and it will be detrimental to community in removing Cypress Park. There is also a need for youth/senior center in Old Town, which is better suited on Linden.

I would appreciate your timely communication and to be kept in the loop about plans in Old Town.

I was also very disappointed that 15 comments were received regarding Linden Ave Item #2 and NONE were read, even after requesting to be read out loud. If it weren't for pandemic, we would have had opportunity to speak out loud to have our voices heard. We only have opportunity to hear all of you, but we are not heard.

Thank you.

Subject: Agenda Item 11 Public Comment
Date: Wednesday, June 24, 2020 6:44:07 PM

Dear City Council of South San Francisco,

My name is Christine Yee, I am a current resident and have been for 9 years. I attended Westborough Middle School (class of '09) and South San Francisco High School (class of '13) and decided to return to this city after attending college on the East Coast.

In light of the recent protests happening in America and in the Bay Area, we, as a nation, have been forced to think deeply about the role of police in our society. It has forced many of us to educate ourselves and to ask what public safety means to us. I am not calling for additional training. I am calling for accountability, demilitarization, and defunding police overtime while investing in social programs and resources to support the most vulnerable populations.

As a resident, I would like to see more investment in our children, starting with services for counseling, afterschool programs, and activities that are run by unarmed community members that know childhood development and understand how to teach and mentor our young people. The budget cuts in the past years for programs that keep youth out of trouble and give them purpose is a crime. This will help build these young people up to reach their full potential. Invest in our children.

Thank you,
Christine
