PROJECT SUMMARY

The proposed development is located on three parcels; 421 Cypress Avenue, 209 and 213 Lux Avenue, totaling 0.584 acres in the City of South San Francisco, CA The development program includes 99 units of for-rent, multi-family housing over ground floor parking, project amenities including leasing offices as well as 1,500 SF allocated for a restaurant at the corner of Lux and Cypress Avenues. Located within the Downtown Specific Plan the project is within 1/4 mile of the South San Francisco Cal Train Station.

The architecture harkens back to the historic character of South San Francisco with its brick base that grounds simple, straight-forward massing with hung balconies along Lux and Cypress Boulevards. The building corner is expressed as a set-back to the corner restaurant with consistent window glazing above defining this corner element. A faithful reproduction of the original Bertolucci sign, located at the corner of the retail, gives the new project a strong identity acknowledging the historic significance of the site for the local community.

Along with ground floor leasing and lounge areas the project provides additional interior amenity area at the podium level that flows out to a shared, south facing, landscaped podium with seating areas and water feature.

LED recessed wall luminaires - unshielded location luminaires

Application

LED recessed wall luminaire with unshielded light for use as location luminaires for means of way finding.

Materials

Luminaire housing constructed of die-cast aluminum marine grade, copper free (≤0.3% copper content) A360.0 aluminum alloy
White safety glass
Silicone applied robotically to plasma treated casting for increased adhesion
High temperature silicone gasket
Mechanically captive stainless steel fasteners
Stainless steel screw clamps
Composite installation housing

NRTL listed to North American Standards, suitable for wet locations
Protection class IP65
Weight: 1.6 lbs

Electrical

Operating voltage 120-277VAC

Minimum start temperature -40° C

LED module wattage 2.7W

System wattage 5.0W

Controllability 0-10V

Color rendering index Ra > 80
