Hello City official,

I am a resident of South City Sunshine Gardens and I would like to submit my protest for this massive development. I am for smart development meaning 6 stories or less. But with this the current infrastructure can not handle this plus the current projects. For example, I think we should have permit parking now in our area. We are constantly having cars tagged that are left for days for none residents. Check police reports. I think 2 permits per household would be a great improvement now in Sunshine Gardens. The other is the traffic i have already reported regarding Hillside and Chestnut. ECR and Chestnut and Westborough corridor is crazy these days. Lights need to be fixed, sometimes we are waiting it seems forever. I have attached signed petition with my objection to high rise. I drove down to South Airport and viewed those new structures and I felt I was in a nightmare thinking my suburb of 35 years would have a monster building 3 times the height. Please DO NOT BUILD highrise, it is not suitable or acceptable in this residential area.

Thank you.

Judi Sanchez

**Who is our City Council representing?  
Tell the City Council NO to the massive  
development at El Camino/Chestnut!**

**8 STORIES - FOR RENT**  
58 UNITS (10 AFFORDABLE  
AT MODERATE LEVEL)

**15 STORIES - FOR SALE**  
141 UNITS

**12 STORIES - FOR SALE**  
118 UNITS

We, the undersigned residents of South San Francisco, oppose any development on the former PUC site in the Chestnut/El Camino corridor extending to Old Mission Road that exceeds three stories in height.

The three alternate plans submitted by the two finalists do not fit the area. This is a high-density area which is experiencing high traffic congestion, a loss of quality of life, and stress on the infrastructure.

We don't oppose development, we support Smart development. Multi-storied towers with 700 to 847 units times how many people and vehicles per unit will only further congest this over-burdened area.
