Will we be able to talk ,will it matter,how much time,all buildings along mission road are zoned 35 feet,even the bart station, SB827 is dead out of housing committee on April 17 2018 ,no longer held to maximum building heights , the half mile rule,,,this land has never had an environmental impact report going back to the 1800. All waterfowl fly along Colma Creek like a road map going back over 100years passing down from generation to generation,the city does not care about wildlife,,as the creek bends behind the PUC following the old flow of the creek,waterfowl ether follow the creek ,fly over the PUC lot , or fly along mission road,this is the lowest point in this u shaped valley . The board of Supervisors of SF on September 16 2004 should not have exempt this transaction under CEQA ,,nothing on record about waterfowl flying over this lot 093312060 ,,must not go over four stories,,,,please send this to all top city officials in Sosf in building department. Thank you Ed swain
