

## Brief History of Firm

SECTION

2

CSG Consultants, Inc. (CSG) is a California company with our corporate office located in Foster City. Additional support is available from our other offices in Pleasanton, San Jose, Sacramento, Orange, Redlands, and Newman. Founded in 1991, **CSG performs work solely for public agencies**, eliminating the potential for conflicts of interest. In this way, we can focus exclusively on the specific needs of our municipal clients.

CSG provides a wide range of services to community development and public works departments, often serving as a seamless extension of City staff. The majority of the 290+ individuals within our firm have provided public agency services throughout their careers. Our talented personnel bring a wealth of ideas and experiences having provided similar services with communities dealing with the same challenges as the City of South San Francisco.

The following represents a brief summary of our firm:

## Familiarity with City of South San Francisco

SECTION

4

CSG Consultants, Inc. (CSG) is a California company with our corporate office located in Foster City, less than 13 miles from South San Francisco City Hall. CSG has performed consulting services to the City of South San Francisco since the early 1990s and intimately familiar with the City's staff, policies, and procedures.

CSG recently assisted the City with Orange Park Stormwater Program management, several Mapping reviews including Oyster Point Interchange Mapping Study, and construction inspection for various development projects. CSG also served as the design consultant for the Junipero Serra Boulevard at King Drive Improvement project and the Terrace Drive Storm Drain Improvement Project.

CSG assisted the City with Federal Grant Administration for several transportation related projects. The HSIP funded projects included the "Grand/Magnolia Traffic Signal" project, the "Evergreen/Mission Traffic Signal" project, and the "Junipero Serra Boulevard at King Drive" project. Each of these HSIP funded projects required CSG to complete the E76 process for both design and construction. The "Los Cerritos School Crossing Improvements" project was a SRTS funded project, the "SSF Grand Blvd Project" is a CMAQ-OBAG funded project, and the "El Camino High School Pedestrian Crossing" is a TDA grant funded project. In addition to developing the documents and coordinating with Caltrans Local Assistance to secure grant funding, CSG has assisted in developing RFPs, staff reports, and council resolutions.

CSG has also provided building plan review, building inspection, fire plan review, fire inspection, IT support, and code enforcement services to the City over the past 26 years.
